## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Amines; hydroxy-bearing esters; hydroxy-bearing ethers; hydroxy-bearing ether-esters; non-hydroxy-bearing esters; non-hydroxy-bearing ethers; non-hydroxy-bearing ether-esters; unsaturated esters; unsaturated ethers; unsaturated ether-esters; and saturated hydroxyl-bearing etherified and/or esterified oligomeric glycols and/or oligools; organic solvent coalescents; and hypersurfactants.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by

Art Unit: 1614

37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Amines (claims 1-3); ammonia neutralizers (claim 2); hydroxy-bearing esters (claims 1-2); hydroxy-bearing ethers (claims 1-2); hydroxy-bearing ether-esters (claims 1-2); non-hydroxy-bearing esters (claims 1-2); non-hydroxy-bearing ethers (claims 1-2); non-hydroxy-bearing ether-esters (claims 1-2); unsaturated esters (claims 1-2); unsaturated ethers (claims 1-2); unsaturated ether-esters (claims 1 and 2); and saturated hydroxyl-bearing etherified and/or esterified oligomeric glycols and/or oligoals (claims 1 and 2); organic solvent coalescents (claim 3); and hypersurfactants (claims 5 and 6).

The following claim(s) are generic: 1-3, 5, and 6.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each of the above-listed terms embrace various and sundry compounds that do not possess a special technical feature.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call to the attorney is not required where: 1) the restriction requirement is complex, 2) the application is being prosecuted pro se, or 3) the examiner knows from past experience that a telephone election will not be made, see MPEP Sect. 812.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. C. Jones whose telephone number is (571)

Art Unit: 1614

272-0578. The examiner can normally be reached on Mondays, Tuesdays, Thursday, and Fridays from 8:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Low, may be reached at (571) 272-0951. The official fax No. for correspondence is (703) 872-9306.
